

Shapes and angles – Checkpoint Primary Math**1. 1 /No.7**

Here is a tile.

The tile shows four different types of 2D shapes.

Mia counts the number of vertices on each of the 2D shapes.
She records the information in a table.

Complete her table.

Some of it has been done for you.

Name of 2D shape	Number of vertices
circle	0
triangle	

[2]

2. 1 /No.20

Here is a diagram showing the route a fish takes in a pond.

The arrows show the directions of the route.

Complete the directions.

east 5 squares

north 5 squares

..... squares

..... squares

..... squares

..... squares

[2]

3. 1 /No.21

Here are some angles.

Draw a ring around the **two** angles that can be joined to make a straight line. [1]

4. 2 /No.2

Sketch the reflection of the shape in the mirror line.

[1]

5. 2 /No.18

Gabriella uses small square tiles to make a rectangle.

Safia uses $\frac{1}{4}$ of Gabriella's tiles to make a new shape.

Tick (✓) all the shapes that Safia could make.

[1]

6. 2 /No.21

Here is a pattern drawn on a grid of squares.

Draw all the lines of symmetry in this pattern.
